

# easyScan

## Testimonials

“We have found the Easy scan, as the name suggest, is very easy to use.

Auto focus & Auto capture allows my colleagues with minimal training to capture high quality detail retinal images and this includes those patients with small pupils.

Since using the EasyScan we have not been dilating patients which we had to do with our previous camera set up, this makes it more convent for our patients.”

Nat Vaja | Nu-Sight Opticians

“ I brought my EasyScan from Grafton Optical and we are over the moon with our purchase.

It has picked up pathology and extra things which ordinarily we would never have seen and it has done wonders for the practice.”

Rod Chanes | Ben Mirkin Opticians

“ I’m very happy I chose EasyScan with its SLO technology because not only is it quick and easy but the images are so clear and so simple to view that I have no doubts.

Like mine your patients are going to be super impressed. With EasyScan it’s in the name: the ease of use provides great comfort for both, the user and the end-user. Even small consulting rooms can accommodate this handy system.

It’s affordable, allows detailed analyses and pinpoints retinal deviations like no other.”
